

PLAITED WOGGLE

Instructions:

1. Start with your strip of leather flat, as in Step 1, then start to plait.
2. Take the right hand strand (blue) over the centre strand (green) all the way to the left, then under the left strand (red) to finish as in Step 2.
3. Holding the top in position, push the bottom completely up through Gap A. This will leave the strands twisted as in Step 3. This is OK.
4. If you now push the bottom through Gap B, everything should come right as in Step 4.
5. A bit of a twist and adjustment, and your woggle plait is complete. Add click-fasteners to the panels at each end, and you are ready to secure your scarf.
